companies, whose shares traded at a minimum of \$6.00 per share in 1999 and also filed their four quarterly reports for fiscal 1999. The findings revealed that each of the company's "OPS" logically fell into one of eight distinctive risk categories. The categories were the genesis of StockDiagnostics.com's numerical eight point, 1 through 8, OPS rankings.

The ranking of 1, which the company received means that Liquidity Services based on its OPS over its most recent four quarters and its aggregated OPS over its latest twelve months is in the lowest risk category. The results from the study indicated that 91.67% of all the companies in this risk category (an OPS Ranking of 1), which had shares that traded at \$6.00 or above in 1999 had share prices, which traded at \$6.00 or above during 2001.
