About OPS Rankings™ changes -- OPS Ranking upgrades and downgrades may predict changes in the momentum of a company's stock price and its inherent or presumed financial health. All OPS Ranking downgrades, even a downgrade from the highest OPS Ranking of "1" to the second highest OPS Ranking of "2" should be treated with equal caution. Similarly, all OPS Ranking upgrades should be considered as equally positive. Even an upgrade from the lowest OPS Ranking of "8" to the second lowest OPS Ranking of "7" can be treated with guarded optimism.

About OPS Rankings™ -- StockDiagnostics.com monitors Operational cash flow Per Share ("OPS") for over 7,000 publicly traded companies and assigns them an "OPS Ranking", which measures the long term risk associated with a company's ability to remain in business. A company's "OPS" logically falls into a mathematical sequence that ranks it into one of eight distinctive "risk" categories. Each of the categories is based on a company's operating cash flow for each of its last 4 quarters and its cumulative operating cash flow for its most recent 12 months. OPS Rankings are upgraded, downgraded or reiterated each time a company files a quarterly report and at any time that its financial statements are amended. Statistical research on OPS Rankings is available at www.StockDiagnostics.com.

About StockDiagnostics.com -- StockDiagnostics.com monitors 1,801 data points on over 10,000 publicly traded companies. It has a proprietary data refinery that automates the process of collecting, sorting and organizing large amounts of securities pricing and financial data into comparative financial ratios. These ratios are used to identify Financial Statement anomalies and securities pricing variances to monitor changes in the performance of public companies. Go to
