About OPS Rankings™ changes -- OPS Ranking upgrades and downgrades may predict changes in the momentum of a company's stock price and its inherent or presumed financial health. All OPS Ranking downgrades, even a downgrade from the highest OPS Ranking of "1" to the second highest OPS Ranking of "2" should be treated with equal caution. Similarly, all OPS Ranking upgrades should be considered as equally positive. Even an upgrade from the lowest OPS Ranking of "8" to the second lowest OPS Ranking of "7" can be treated with guarded optimism.

share in 1999 and also filed their four quarterly reports for fiscal 1999. The findings revealed that each of the company's "OPS" logically fell into one of eight distinctive risk categories. The categories were the genesis of StockDiagnostics.com's numerical eight point, 1 through 8, OPS rankings.

The ranking of 1, which the company received means that Novellus Systems based on its OPS over its most recent four quarters and its aggregated OPS over its latest twelve months is in the lowest risk category. The results from the study indicated that 91.67% of all the companies in this risk category (an OPS Ranking of 1), which had shares that traded at \$6.00 or above in 1999 had share prices, which traded at \$6.00 or above during 2001.
